

*"Our vision is to be the preferred
Horizontal Directional Drilling (HDD)
company in North America."*

ABOUT US

Atlas Trenchless, LLC is recognized as a preferred contractor specializing in Horizontal Directional Drilling (HDD) and Tunnel Boring techniques in complex and environmentally sensitive terrain. Our team includes some of the most experienced, dedicated, and highly motivated drillers in the nation. Supplying our employees with state of the art equipment, Atlas has successfully built a reputation for delivering high quality results on time and on budget within a SAFE work environment. Our dedication to high performance standards continues to strengthen our working relationships and expand our network of satisfied Owners and Engineers. We strive to protect the best interests of our customers and will continue to partner with them as we progress forward to meet the increasing challenges within the HDD industry.

STRONG SAFETY CULTURE

- Every action undertaken by Atlas employees considers the safety of all people on the job site before implementation.
- Job Safety Analysis Reports are completed daily and more frequent if changing conditions warrant.
- All employees are empowered to correct any unsafe conditions immediately.
- Employees are certified in OSHA 30, CPR Training and Confined Space/Competent Person.
- Any near miss incidents are reported immediately to a supervisor and a thorough review is performed in order to prevent future occurrences.

CAPABILITIES

- Drill rigs from 100,000 to 500,000 lbs of drilling thrust/pullback force
- Utilizes Paratrack2 wireline guidance systems
- Drilling through sensitive environmental regions up to 48" in diameter
- Akkerman GBM system to ensure line and grade pipe ramming

BONDED AND INSURED

MISSION STATEMENT

"We strive to exceed our customers' expectations with quality craftsmanship through our highly qualified employees, commitment to safety, and innovative practices."

HORIZONTAL DIRECTIONAL DRILLING

- Markets Served: oil, gas, water, sewer, electric, telephone and other applications
- Experience working in all types of formation throughout the U.S.
- Minimizes impact to the environment

- Capable of installing pipe up to 48" in diameter
- Lengths over 6,000 LF and intersect capabilities

BORING

AUGER • GUIDED • TUNNELING • PIPE RAMMING

PIPE RAMMING

AUGER BORING

- Capable of installing 12"-72" diameter pipe
- Drill lengths up to 400 LF
- Install through soft ground, clay and rock conditions

GUIDED BORING

- Capable of installing 12"-72" diameter pipe
- Lengths up to 400 LF
- Install through soft ground, clay and rock conditions

TUNNELING

- Capable of installing any length of 45" through 120" diameter pipe
- Install through soft ground, clay and rock conditions
- Experience with steel casing, liner plate, and rib and lagging

PIPE RAMMING

- Capable of installing 24"-72" diameter pipe
- Lengths up to 300 LF
- Install through unconsolidated conditions
